

Land Records Kickstart

Land Records Management using Esri's parcel fabric

Cloudpoint Geospatial Kickstart Packages are short-term, high-impact services that provide knowledge transfer, best practices, and consulting support on a variety of Esri products and GIS management tasks. Migrating to the parcel fabric can help your organization save time and money with an optimized method of parcel data maintenance. The parcel fabric is continuously supported and updated by Esri to enhance its abilities within the ArcGIS platform.

What do you get with a Cloudpoint Land Records Kickstart?

- ◆ Hands-on training on migrating to the Parcel Fabric and the Parcel Editing Toolbar
- ◆ Configuration of the Parcel Fabric with the ArcGIS Local Government Information Model
- ◆ Creation of three plans within the Plan Directory from existing survey plats (provided by Client)
- ◆ Training on the proper use of control points and performing adjustments within the fabric
- ◆ Setup of an MXD template with layers & symbology optimized for use with the Parcel Fabric
- ◆ Introduction on using automated parcel editing workflows using the Parcel Editor Toolbar
- ◆ No third party tools to install or manage
- ◆ Includes four hours of remote follow-up tech support
